

## HOW TO SET UP HOSTING with YOUR NEW ACCOUNT

Log in to your domain name company's webpage with your user name and password. If you are setting up a new domain, DO NOT chose their hosting option.

Go to your domains (fig. 1) and select the domain you want to host with Tbyter.

If it says to Active or Launch, click that. If you have more than one Domain, select the one you would like to be hosted on Tbyter (fig. 2)
